

兔抗 LAT 多克隆抗体

中文名称:	兔抗 LAT 多克隆抗体
英文名称:	Anti-LAT rabbit polyclonal antibody
别名:	LAT1; pp36
相关类别:	一抗
储存:	冷冻 (-20℃)
宿主:	Rabbit
抗原:	LAT
反应种属:	Human, Rat
标记物:	Unconjugate
克隆类型:	rabbit polyclonal

技术规格

Background:	The protein encoded by this gene is phosphorylated by ZAP-70/Syk protein tyrosine kinases following activation of the T-cell antigen receptor (TCR) signal transduction pathway. It is a transmembrane protein that localizes to lipid rafts and acts as a docking site for SH2 domain-containing proteins. Upon phosphorylation, this protein recruits multiple adaptor proteins and downstream signaling molecules into multimolecular signaling complexes located near the site of TCR engagement. Alternative splicing results in multiple transcript variants encoding different isoforms.
Applications:	ELISA, WB
Name of antibody:	LAT
Immunogen:	Synthetic peptide of human LAT

Full name:	linker for activation of T cells
Synonyms:	LAT1; pp36
SwissProt:	O43561
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	28 kDa
WB Positive control:	Human lymph gland tissue lysate
WB Recommended dilution:	200-1000
